

**CARPET CLEANER
INDUSTRIES**

THE CLEAN KEEPERS.

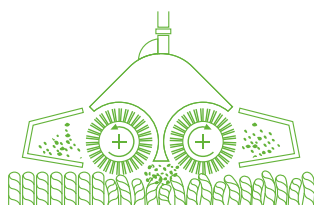

**LOW MOISTURE CARPET
CLEANING**

INTENSE DEEP CLEANING & DRY EXTRACTION

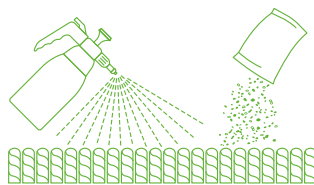

DEEP CLEANING is typically performed annually or semi-annually, depending on the traffic levels of the facility. This process provides the most intensive cleaning to restore heavily soiled carpets and requires several steps to achieve optimal results. Before applying any cleaning products, dry soil removal can eliminate up to 75–80 % of the soil in the carpet while also lifting the pile and preparing the fibers for treatment. Crystal Cleaner loosens the soil from the carpet fibers, while the Drynamite cleaning compound absorbs the dirt like millions of tiny sponges. After removing the soiled compound, the carpet is clean, dry and immediately ready for use.

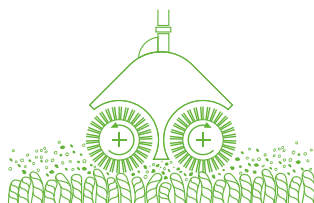

CRB MACHINE & RENOVATORS

Remove dry soil and lift the carpet pile.

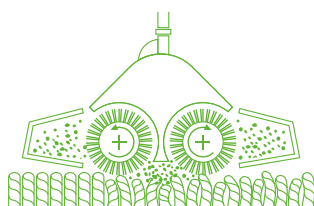

CRYSTAL CLEANER & DRYNAMITE COMPOUND

Prespray **Crystal Cleaner** and sprinkle the Drynamite cleaning compound.

CRB MACHINE

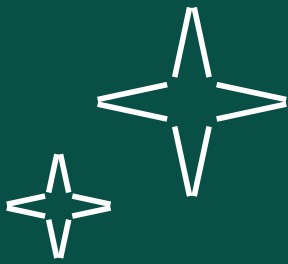

Brush in the **Drynamite** compound.

CRB MACHINE & RENOVATORS

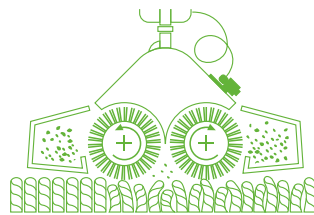

Pick up the soiled **compound**.

INTERIM CLEANING WITH CRYSTAL CLEANER

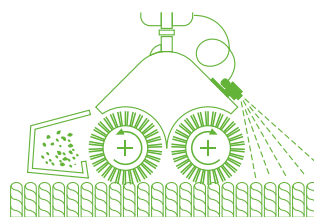

INTERIM CLEANING is ideally carried out several times between deep cleaning cycles. For example, if deep cleaning is performed once per year, interim cleaning can be scheduled quarterly to treat high-traffic areas and maintain the overall appearance of the carpet.

Crystal Cleaner loosens and encapsulates soil from the carpet fibers, allowing it to be easily removed. Regular interim cleaning keeps carpets looking fresh and extends their service life by removing dry soil more frequently.

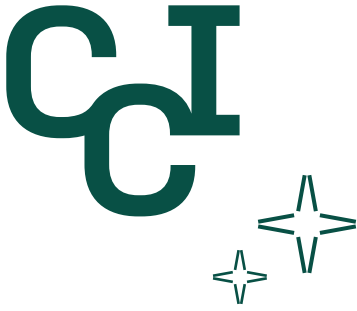

CRB MACHINE, SPRAYER & RENOVATOR

Remove dry soil and lift the carpet pile.

CRB MACHINE & SPRAYER

Spray and brush-in
Crystal Cleaner.

CARPET CLEANER DRY CLEANING SYSTEM

ADVANTAGES

- > no furniture removal
- > no drying time
- > clean during business hours
- > no water marks
- > no residues
- > extends the lifetime of the carpet
- > saves time and money

APPLICATION SPECTRUM

- > deep cleaning
- > interim cleaning
- > partial cleaning
- > dry soil removal
- > dry extraction
- > pile lifting and encapsulation
- > low moisture and dry cleaning

Only clean soiled areas:

-  accumulations of dirt
-  main traffic lanes
-  spots
